## The ACI Concrete Testing Technician - Grade 1 Program

This training course offers instruction in the fundamentals of concrete procedures. Emphasis is placed upon practical information and skills which will help quality-control and testing personnel do their jobs more efficiently and accurately to ensure consistent, good quality concrete and reliable test results. ASTM C94 requires anyone testing concrete in the field to be certified through an ACI equivalent program. The WRMCA program is the only such program offered in Wisconsin. Previous experience and careful review of the training materials is recommended. The course involves a morning classroom session and instruction in basic concrete materials and concrete testing procedures: slump, air, yield, temperature, measurement, rolla meter and cylinder casting. After the lecture, a written exam is given. The afternoon field test session includes demonstrations and practice in proper concrete testing procedure.

An examination will be given and requires each participant to carry out the proper testing procedures for slump, air content, yield temperature measurement, rolla meter, and cylinder. **The exam is closed book. YOU MUST BRING A CALCULATOR.**

### Who Is Invited

This course is open to technicians employed by concrete suppliers, contractors, testing lab personnel, government agency personnel, and other individuals employed in the construction industry.

**NOTE - please dress in casual wear - boots, jeans, sweatshirt as the field testing is hands-on.**

### Cost

WRMCA Member	\$405
Non-Member	\$580
Fulltime Student	\$300 *student ID required
Written Exam Retake	\$260

\*\*\*Study materials are mailed when the registration form is received.
