

CONCRETE PARKING LOT

Dayton Freight

Sturtevant, WI

Owner

Dayton Freight

Ready Mixed Concrete Supplier

Riv/Crete Ready Mix

Project Description

Ready mixed concrete volume: **13,000 c.y.**

Concrete paving thickness: **7"**

Completion date: **Fall 2019**

Project Details

Over 13,000 c.y. of durable exterior concrete was poured on this Dayton Freight parking lot project.

The concrete placement rate averaged roughly 400 c.y./day, with a single-day high of 940 cy. Concrete islands were built using cutting edge technology: a stringless GPS curb & gutter machine efficiently poured and maneuvered around the numerous curbs, while reducing setup time.

Contractor efficiency and speed of construction met the owner's aggressive schedule, allowing it to open early.

Dayton Freight operates two shifts, with 50 trucks per day off-loading and loading freight. The ownership team is thrilled with the new concrete parking lot.
