Lake Geneva WI

Owner

Tristan Crist Magic Theatre

Ready Mixed Concrete Supplier

Otto Jacobs Company
Lake Geneva, WI

Project Description

Ready mixed concrete volume – 500 cy
Concrete paving thickness – 5”
Project completion date – April 2019

Project Details

Project owner Tristan Crist started out with a small 50 seat theater in downtown Lake Geneva, but the theater's growing popularity led to a brand new 150 seat facility.

Swederski Concrete Paving worked with the project's general contractor (Geneva Bay Construction) to consider concrete paving instead of asphalt for the new theater parking lot. Business owners sometimes assume that concrete is too expensive, but after consulting with Mr. Crist about concrete's long term value, the decision was made to use concrete instead of asphalt.

"I like the bright, clean look of our new concrete parking lot. We were surprised at how similar the first cost of concrete was compared to asphalt, so it was a no-brainer," says Crist.
