

# CONCRETE PARKING LOT

## Truck Country Inc.

DeForest, WI

### Owner

Truck Country Inc.

### Ready Mixed Concrete Supplier

LYCON Inc.

### Project Description

Ready mixed concrete volume: **17,000 c.y.**  
Concrete paving thickness: **8" Unreinforced**  
Completion date: **Fall 2016**

### Project Details

Pinnacle Engineering Group, Brookfield WI, designed the project, and the general contractor was Beaudry Services.

LYCON Inc. in Madison provided a concrete mix design utilizing large coarse aggregates to reduce shrinkage and curling. The paving contractor placed over 800 c.y. per day using a laser screed. TK26 cure and seal compound was applied immediately after finishing operations that both cures the concrete and provides extra protection against future surface defects.

This project was successfully completed in the fall of 2016. Truck Country Inc. uses concrete parking lots at all of its new locations throughout the Midwest.
