

The Program

ACI Laboratory Technician Certification Program

Certification Level

Concrete Strength Testing Technician is an individual who has demonstrated the knowledge and ability to properly perform, record, and report the results of four basic ASTM laboratory procedures related to the determination of concrete compressive and flexural strength.

Scope & Knowledge

The program requires a working knowledge of the following ASTM Standards:

C617-Capping Cylindrical Concrete Specimens

C1231-Unbonded Caps for Concrete Cylinders

C39-Compressive Strength of Cylindrical Concrete Specimens

C78-Flexural Strength of Concrete

Certification Requirements

Certification will be granted to those with

1.) A passing grade on the written examination; and

2.) Successful completion of the performance examination.

The one hour written examination consists of 40 multiple choice questions. There are at least 8 questions on each of the ASTM Standards.

To pass the exam you must have: at least 60% correct for each of the required standards, and a minimum score of 70% overall. The performance examination requires demonstration of the required ASTM Standards.

Recertification is required every 5 years, and requires completion of the written and performance examinations.

How To Register

Complete the enclosed registration form. Payment must be received in order to be registered. If paying by check, make check payable to WRMCA.

Mail the form and payment to:

WRMCA
44 E Mifflin Street
Suite 305
Madison, WI 53703

Or you can email your registration form with your credit card number to knovak@thekammergroup.com.
