

CONCRETE PARKING LOT

Kwik Trip – Somers, WI

Owner

Kwik Trip

Ready Mixed Concrete Supplier

Point Ready Mix

Project Description

Ready mixed concrete volume: **12,000 cubic yards**

Completion date: **June 2022**

Project Details

Wisconsin's largest Kwik Trip facility was awarded to a parking lot contractor for their knowledge, quality, resources, and ability to quickly place large pavements efficiently.

This 569,000 square foot pavement project presented difficult and unique challenges, not just by placing concrete, but more so by educating all parties with alternative concrete pavement designs and practices.

9 different mixes were used for the project between September 2021 and June 2022. Fly ash was used to reduce the carbon footprint. A total of about 12,000 cubic yards were placed.

Construction team members collaborated to construct a sustainable parking lot which saved Kwik Trip upwards of \$1 million and reduced both the schedule and safety hazards. Kwik Trip took occupancy one month after the last concrete delivery.
