

CONCRETE PAVING

Boys & Girls Clubs of the Fox Valley

Parking Lot

Owner

Boys & Girls Clubs of the Fox Valley

Ready Mixed Concrete Supplier

Carew Concrete & Supply, Co., Inc.

Project Description

Ready mixed concrete volume: 450 cubic yards
Completion date: Summer 2023

Project Details

The Boys and Girls Clubs project consisted of replacing two broken up asphalt parking lots in downtown Appleton.

The concrete supplier was asked to participate in the project to complete concrete overlays to replace both parking lots in partnership with Mark Cardinal Concrete Construction in the summer of 2023.

The 4-inch overlays were completed over several days and completely changed the parking situation for the club.

The concrete overlay created a safe lot for parking and the light surface improved the nighttime visibility without changing the lighting placement. The Director of the facility was very pleased with the project and the improvement that the new lots added to their entire property.

The project was completed in June of 2023. It is an excellent example of concrete as a replacement for asphalt.
