

# CONCRETE PAVING

## National Exchange Bank & Trust

### Parking Lot in West Bend, WI

#### Owner

National Exchange Bank & Trust

#### Ready Mixed Concrete Supplier

Schmitz Ready Mix

#### Contractor

Mark Cardinal Concrete & Construction

#### Project Description

Ready-mixed concrete volume: 590 cubic yards

Completion date: December 2023

#### Project Details

National Exchange Bank & Trust in West Bend was built in 1995. The parking lot reconstruction was a unique project. It is one of twelve concrete parking lots for the bank, which has an extensive branch network in Southeastern Wisconsin. The project consisted of the reconstruction of a blacktop parking lot using 590 cubic yards of concrete.

By choosing concrete for the slab and adding fibers to the mix, the parking lot will provide a highly durable and long-lasting surface requiring minimal maintenance compared to the previous asphalt parking lot.

The concrete parking lot will also provide more benefits like superior load-bearing capacity, better heat reflection, and a longer lifespan, making the parking lot ideal for heavy traffic and harsh weather conditions.
