

# CONCRETE PAVING

## Lucette Brewing Company Parking Lot in Menomonie

### Owner

Lucette Brewing Company

### Ready Mixed Concrete Supplier

Cemstone Ready Mix

### Contractor

Atlas Specialty Contracting

### Project Description

**Ready-mixed concrete volume:** 1,000 cubic yards

**Completion date:** Fall 2024

### Project Details

Lucette Brewing Company decided to invest in concrete for its parking lot long before it was installed in the fall of 2024.

The process began with a simple question from the Cemstone representative during the building's construction in 2021, when the foundation system used ICFs. "Have you thought about concrete for the parking lot?"

From there, the conversion process began. Initially designed as an asphalt parking lot, this 63,000-square-foot, 5-inch-thick, macrofiber-reinforced, 4,500-psi parking lot was designed in 2023 using [pavementdesigner.org](http://pavementdesigner.org).

It was installed in the fall of 2024 using laser-screed technology over 4 days so the brewery could remain operational.

Cemstone and Atlas Specialty Contracting worked together to meet ACI standards, ensuring the concrete delivered the quality, appearance, and long-term performance the owner expected.
